v.2

FEATURES

effective ventilation system [MPW-352]

with cooling [MPW-352R]

with cooling and heating [MPW-352RH]

temperature +4°C ensured for maximum speed of each rotor [MPW-352R, MPW-352RH]

delayed start function

start when preselected temperature is reached [MPW-352R, MPW-352RH]

initial cooling without/with centrifuging, cooling after centrifuging, precise temperature stabilization [MPW-352R, MPW-352RH]

maintenance-free induction motor

modern software system

large graphic LCD - blanking the screen after a period of inactivity

preselected and real values of speed, RCF, time shown on the display at the same time [MPW-352]

preselected and real values of speed, RCF, time and temperature shown on the display at the same time [MPW-352R, MPW-352RH]

100 user programs

10 acceleration/deceleration curves

programming of multi-section acceleration/deceleration curves

RPM/RCF adjustment

manual centrifugal radius adjustment [with automatic RCF correction]

two modes of time calculation: from start key pressing or from reaching preselected speed

continuous operation mode - HOLD

SHORT time operation mode

possibility of changing of parameters during centrifuging

automatic rotor identification

automatic lid opening

motorised lid lock

centrifuging parameters recording [USB port]

menu language setting [PL, EN, ES, IT, PT, DE, RU, FR, SE, CZ]

selected functions blocking, password protection

manual adjustment of density of samples >1,2g/cm³ [with automatic maximum speed correction]

stainless steel rotor chamber

stainless steel rotor chamber

unbalance sensor

lid locking during rotor running

start blocking at opened lid

emergency lid lock release

motor thermal protection

product conforming with the EN-61010-1 and EN-61010-2-020, EN-61010-2-101 standards

MPW-352, MPW-352R and MPW-352RH centrifuge is a family of high-performance, most versatile, table top laboratory centrifuges that offer the largest range of available rotors and other items of equipment [containers, reduction inserts, consumables]. High-speed angular rotors [RCF up to 30,065 x g], low-speed angular and horizontal rotors [RCF below 6,300 x g], specialized rotors [cyto for the preparation of cytodiagnostic preparations], hematocrit and titration rotors, the variety in the number [up to 36 pieces], as well as the capacity

[from 0.2 ml to 250 ml] of centrifuged tubes and centrifugation vessels available on the market, in one process, make centrifuges widely used and irreplaceable in laboratories of many branches: medicine, chemistry, science, biology, cosmetology, experimental molecular cuisine, food industry, environmental protection, and others. Devices ensure high centrifugation parameters, precision [accuracy of parameter setting, to "1"], and thus repeatability of the entire sample preparation process for further specialized tests.

¹ Time and possibility of obtaining a set temperature is dependant on multiple factors, including: established RPM, rotor type, ambient temperature. §
